Statement of Requirements for parking working group established September 2018

The parking Working Group, was set up to resolve the riverside parking problems since the BPC had acquired the car park and BANES no longer patrolled to enforce overstayers.

Due to the fact that the BANES signs advising of 3 hours free parking had been removed, the parking had become a free for all and the BPC were receiving complaints both from businesses and residents that local people could not access the car park due to the fact that some car owners were using it as an unofficial park and ride during the day.

The parking working group were tasked with discussing the options, involving members of the public and also business representatives, and to come up with options to put to the BPC to resolve the current parking difficulties.

Two meetings were held. The first on 19th November 2018 and the final meeting was held on 11th February, 2019. (See notes of the 2nd meeting of the Parking Working group where two options were provided to the BPC.

These options were discussed and voted on at the BPC on 19th February 2019.
