

PROPOSAL FROM TRUESPEED BROADBAND

Hi Sarah,

It is a decision for individual households but we do require a 30% uptake of homes before we start to build our network throughout your village. The 30% threshold for Batheaston is 450 orders we are looking to spend over £2,000,000 (private money) to bring our network to the village.

We have currently built into over 80 villages some of these villages are: Priston, Bishop Sutton, East Harptree, West Harptree, Litton, Hinton Blewett, Compton Martin, Ubley, Inglesbatch, Nailwell, Dunkerton, Kelston, Corston, Newton St Loe and many more.

We do try to create a community vibe in the villages we go to, we generally find this helps spread the word about what we are doing quicker and of course we offer the local schools and a community hub FREE broadband for LIFE. This means those organisations will never pay us any money for installation or for the use of our broadband.

If you have a Parish meeting coming up I am more than happy to attend to discuss further.

Regards

Will Jones
